Big waves, big fun

What a perfect day ~~of swimming~~. In fact, the only
thing better than the waves was getting to see...

97pt

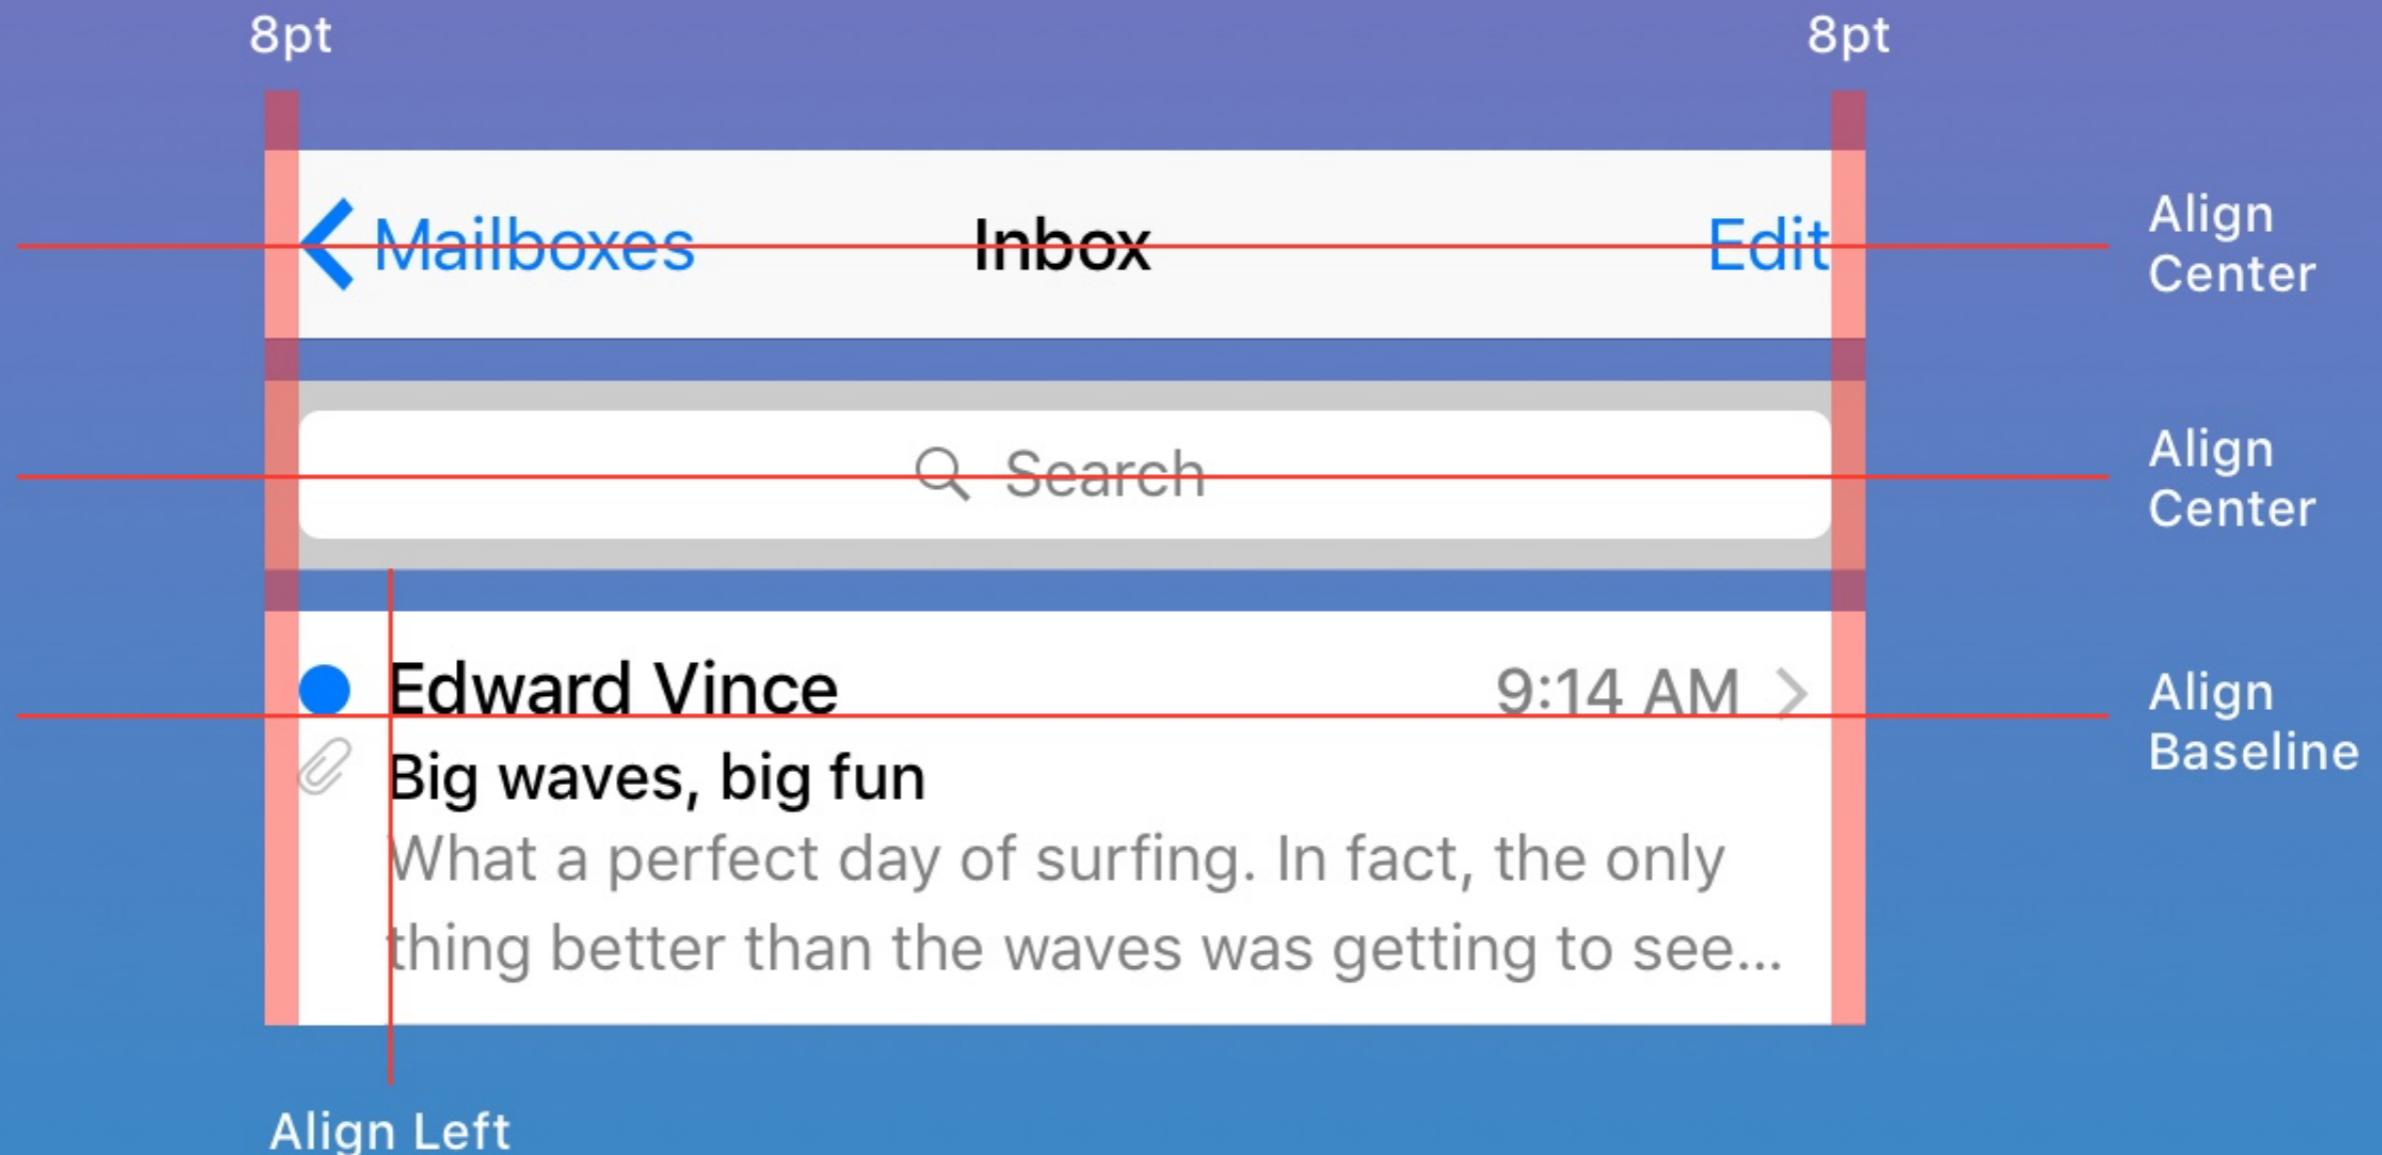

Probably because we could
see your cards reflected in
your sunglasses.

Custom Controls?

The screenshot shows the homepage of [CocoaControls.com](http://www.coco-controls.com). The page features a large banner with the text "5654 open source UI components for iOS, macOS, tvOS, and watchOS." Below the banner is a search bar and filters for sorting by Date, Rating, Apps, Platform (All, iOS, macOS, tvOS, watchOS), Language (All, JavaScript (React Native), Objective-C, Swift), and License (All, Apache 2.0, BSD, CC BY 3.0, CC BY-SA 3.0, CC BY-SA 4.0, Commercial, Custom, Eclipse Public License, GPL, GPL (Affero), ISC, LGPL, MIT, MPL, Public Domain, Unspecified, zlib). The main content area displays four examples of custom UI controls:

- AVPlayerOverlay**: A screenshot of an iPhone screen showing a video player overlay with controls for volume, brightness, and playback.
- Call State Logs**: A screenshot of an iPhone screen displaying a list of call states: Disconnected, Dialing, Disconnected, Incoming, and Disconnected.
- Start Listener**, **Call your friend**, **Stop Listener**: A screenshot of an iPhone screen with three purple buttons labeled "Start Listener", "Call your friend", and "Stop Listener".
- Enter Passcode**: A screenshot of an iPhone screen showing a numeric keypad for entering a passcode.
- AAPlayer**: A screenshot of an iPhone screen displaying a video player interface with a play button, volume control, and progress bar.

Each example includes a timestamp (August 18, 2017) and a license note (MIT License).
